

Signal — Phase 2 Roadmap

Now (MVP)

Judgment layer, Excel OS, digest/alerts, grounded chat, seed + EDGAR/HN/RSS/arXiv proof of ingest, **live discovery** that can add Watch skeletons from thesis-matching signals, partner Library UI (news / commentary / watch / stale).

Full brief mapping: [COVERAGE.md](#).

Next (30–60 days)

Connector	Purpose
Crunchbase / Harmonic / Dealroom	Structured rounds, investors, descriptions
PitchBook	Institutional coverage + comps
Coresignal	Headcount / hiring velocity
X / Reddit vendor APIs	Live investor & operator commentary
SharePoint / OneDrive	Live shared workbook
SendGrid / SES	Production M/W/F + alerts
Form D × ~11.5k firm cross-ref	New fund announcement detection

Later

- Affinity / Attio writeback
- Continuous workers (not batch refresh)
- Podcast transcript ingestion
- Formal IC brief PDF export
- GitHub stars / commit velocity adapter
- SSO + audit log for multi-partner funds

Non-goals

Authenticated scraping of Blind / LinkedIn / X timelines without vendor APIs.
